USAspending contract data as of Nov 15, 2026; forecasts as of Nov 6, 2026; generated 2026-11-15T08:40:52.673Z
Coverage caveat: Current standings, win rates, and recompete timing are hidden while we verify recent USAspending award capture — historical (fiscal-year) totals are shown, since those are independently confirmed complete, but anything based on the last few months is not yet. (coverage last measured 12 days ago)

Recompete Briefing — week of November 16, 2026 (ISO week 2026-W47)

Federal contracts reaching their final end date — the work that comes back up for competition. Computed from public federal data with the Recompete Tracker's default filters (at least $250K obligated, next 18 months).

Value entering the recompete window

Window	Contracts	Obligated value
Next 30 days	7,180	—
Next 90 days	22,888	—
Next 180 days	40,890	—
Next 18 months (tracker window)	85,296	—

Counts are of captured contracts — likely undercounted while coverage is below target; dollar totals hidden.

10 largest upcoming expirations

#	Agency	Incumbent	NAICS	Value	Recompete
1	Department of Energy	HONEYWELL INTERNATIONAL INC	561210	$44.1B	2027-04-30
2	Department of Energy	CONSOLIDATED NUCLEAR SECURITY, LLC	561210	$35.2B	2027-09-30
3	Department of Energy	BATTELLE MEMORIAL INSTITUTE	541710	$31.2B	2027-09-30
4	Department of Energy	FLUOR CORPORATION	561210	$28.0B	2027-09-30
5	Department of Energy	LOCKHEED MARTIN CORP	561210	$20.6B	2027-02-28
6	Department of Defense	GENERAL DYNAMICS CORP	336611	$20.4B	2027-08-01
7	Department of Defense	THE BOEING COMPANY	336411	$18.1B	2027-04-30
8	Department of Energy	BECHTEL GROUP, INC.	234930	$18.0B	2027-04-11
9	National Aeronautics and Space Administration	LOCKHEED MARTIN CORP	541710	$15.6B	2027-04-15
10	Department of Energy	LELAND STANFORD JUNIOR UNIVERSITY	541710	$15.1B	2027-09-30

Most vulnerable incumbents

#	Incumbent	Score	Why (the score's own reasons)	Contract · recompete
1	THE BEACON GROUP INC	75	Incumbent has 1 active sanction; Expires within 90 days; Only 1 offer last time — thin competition	SP470124C0035 · 2026-12-18
2	ATI GOVERNMENT SOLUTIONS LLC	65	Incumbent has 1 active sanction; Expires within 90 days; Last awarded without competition	89503324PWA000354 · 2026-12-23
3	VC DISPLAYS, INC.	65	Incumbent has 1 active sanction; Expires within 90 days; Last awarded without competition	SPE4A526P0977 · 2026-12-28
4	HANKUK VEHICLES CO., LTD.	65	Incumbent has 1 active sanction; Expires within 90 days	W90VN922C0003 · 2026-12-31
5	CLEMONS INC	65	Incumbent has 1 active sanction; Expires within 90 days; Last awarded without competition	36C25023C0200 · 2027-02-01
6	THE INSPIRED GROUP, LLC	55	Incumbent has 1 active sanction; Expires within 180 days	W912P626CA003 · 2027-03-25

7	INOTIV, INC	55	Incumbent has 2 active sanctions; Only 1 offer last time — thin competition	75A50124P00003 · 2027-09-29
8	M. C. DEAN, INC.	50	Expires within 90 days; Only 1 offer last time — thin competition	W912DY23F0041 · 2026-11-16
9	BURNS & MCDONNELL ENGINEERING COMPANY, INC.	50	Expires within 90 days; Only 1 offer last time — thin competition	W912WJ24F0041 · 2026-11-16
10	BLACK & VEATCH HOLDING CO	50	Expires within 90 days; Only 1 offer last time — thin competition	W912GB19F0070 · 2026-11-16

The Recompete Tracker's vulnerability score (0–100): a base of 20, +25 for an active exclusion linked to the incumbent by identifier, +20 for a final end date within 90 days (+10 within 180) and +10 when a competed award drew a single offer. Name-only matches (such as EPA enforcement) are never used here. Every one of the 85,296 contracts under the tracker's default filters is scored; each incumbent corporate family appears once, by its highest-scored contract. The top 50 are in the vulnerable-incumbents CSV: https://govfabric.com/briefing/recompete/2026-W47/csv?table=vulnerable

Pre-RFP forecasts

8,309 open forecasts (of 16,794 on record). In the last 7 days, 21 were published by agencies (their publish date) and 1,218 were first added to GovFabric's database — different measures.

Agency	Open forecasts
Department of the Interior	2,313
Department of Agriculture	1,952
Department of Commerce	1,616
General Services Administration	785
Department of Transportation	540
DHS	453
Department of State	334
Department of Education	201

No list was stored for the previous week (the last one is 2026-W45), so no changes are claimed this week: counts only.

Acquisition Gateway Forecasts — loaded Oct 27, 2026; 7,856 open.

DHS Acquisition Planning Forecast System (APFS) — loaded Nov 6, 2026; 453 open.

All feeds: 8,309 open, against 6,278 on the list stored for 2026-W45.

Concentration

Hidden this week: recent contract coverage is below target (see the caveat above).

Methodology

Sources: USAspending.gov; SAM.gov exclusions; DHS Acquisition Planning Forecast System (APFS); Acquisition Gateway Forecasts.

Filters: The Recompete Tracker's default view: contracts whose final end date (options included) falls between now and 18 months out, with at least $250,000 obligated; all agencies, NAICS codes and set-aside types.

Before those filters (the full recompete window) the next-90-day slice is 153,415 contracts / —; the minimum-value filter removes small delivery and task orders that would otherwise dominate the count.

Value is the obligated amount on the expiring award as reported to USAspending; the follow-on award may differ.

Recompete date is the final end date with all options exercised (USAspending potential end date), not the current period end.

Most vulnerable incumbents: every one of the 85,296 contracts under these filters with a linked incumbent registration is scored; each incumbent corporate family is listed once, by its highest-scored contract, and the top 50 families are kept (the page shows 10; the CSV has all). Ties go to the sooner recompete date, then the larger obligated value. USAspending's placeholder recipients for undisclosed awardees are left out.

Vulnerability score (0–100), the Recompete Tracker's: a base of 20; +25 when the incumbent's registration has an active exclusion linked to it by identifier — its UEI, or for HHS-OIG and state Medicaid lists an organization NPI — never by name; +20 when the contract reaches its final end date within 90 days (+10 within 180); +10 when the last award was competed (full and open, or under simplified acquisition) and drew only one offer. Name-only matches (EPA enforcement, OFAC, the Consolidated Screening List) are never scored or shown here. Capped at 100.

Incumbents are shown under their corporate family (USAspending parent); each links to the registration that holds the contract.

Open forecasts: forecast records whose date is today or later, or not stated. The date is the estimated solicitation release date (DHS APFS) or, for the Acquisition Gateway, which gives no release date, the estimated start of performance. "Added to GovFabric" counts records first loaded into our database in the 7 days to generation; "published by agencies" counts records whose agency publish date falls in those 7 days. They are different numbers.

Forecast changes compare this week's open forecasts with last week's stored list, per feed, and only for feeds that loaded in between; a feed that did not load is marked "not refreshed" and none of its forecasts are counted as removed. Our feeds only add or update records, so a forecast leaving the open list almost always means its date passed. Release-date moves are DHS APFS only: the Acquisition Gateway gives no solicitation release date, so its forecasts are never counted as release-date moves. The Acquisition Gateway's 2099 placeholder date is treated as not stated: such forecasts count as open. The last stored week is 2026-W45, not the previous week, so only counts are shown.

Dollar totals and concentration are hidden this week because recent contract coverage is below target.

Built only from public federal data (USAspending.gov, SAM.gov and agency procurement forecasts). No customer or account data is used.
